PROFESSIONAL SUMMARY

I'm a technical project manager and producer with over 10 years turning complex engineering functionality into clear product narratives and finished launch assets, including five years on Apple's flagship releases. I partner with engineering and marketing teams to align messaging and positioning with technical capabilities, managing end-to-end deliverables for the Vision Pro Guided Tour, iPhone 16 Pro, and Mac mini. Outside my day job, I design and build software tools using AI-assisted prototyping environments.

PROFESSIONAL EXPERIENCE

Senior Image Content Producer - Apple (via Hogarth) *September 2025 - Present*

- Promoted to Image Content Producer for global marketing assets as the lead decision maker on production quality and brand consistency.
- Directed end-to-end localization programs supporting worldwide product launches, ensuring regional compliance, cultural accuracy, and delivery across multiple international markets.
- Streamlined production workflows across creative, engineering, and marketing teams to maintain speed, quality, and launch readiness.

Lead Video Content Project Manager - Apple (via Hogarth) *2021 - September 2025*

- Managed end-to-end video production lifecycles for high-fidelity, UI-accurate screen animations featured on Apple.com, global broadcast advertising, and retail demos for major product verticals including iPhone, Mac, and Vision Pro.
- Led end-to-end production of UI-accurate product marketing assets featured across Apple.com, keynote presentations, retail experiences, and global advertising campaigns.
- Partnered with marketing and engineering stakeholders to ensure consumer-facing messaging accurately reflected technical product capabilities, flagging misalignment between proposed creative narratives and actual feature functionality, and recommending adjusted positioning.
- Weighed project scope, budget, and timeline dependencies against parallel initiatives and post-launch revision plans to inform prioritization across concurrent launches.
- Maintained rigorous quality assurance testing throughout the digital product asset lifecycle.
- Owned the full production pipeline from creative brief through final delivery on high-visibility launch assets, including iPhone 16 Pro, Mac mini, and the Vision Pro Guided Tour.

Product Development Coordinator - Williams-Sonoma Inc. (Pottery Barn Kids) *2018 - 2021*

- Streamlined asset workflows by tracking deliverables between internal design artists, business affairs, licensing teams, and international manufacturing partners to ensure on-time product launches.
- Coordinated with cross-functional team members to manage new product creation from concept approval through mass manufacturing.
- Managed communications and timelines between in-house design staff, mock store display builds, and executive review sessions.

Marketing Event Manager - Encore (PSAV) *2015 - 2018*

- Managed high-profile corporate events from initial concept to completion, overseeing video production, AV elements, staging, and venue coordination for audiences ranging from 50 to 4,000 attendees.
- Directed creative and labor teams while facilitating communication pathways between corporate product groups.
- Oversaw budget allocations and venue execution parameters to maximize client satisfaction and ROI.

Additional Experience:

Technical Director - Graceway Church *2015-Present (concurrent, volunteer/part-time)*

- Lead all technical production and creative operations for Sunday services, special events and regional conferences, overseeing lighting, audio, video, networking, livestream, and production infrastructure.
- Serve as the primary technical advisor to executive leadership, translating creative vision into scalable production strategies.
- Built and developed a high-performing volunteer production team through structured training, documentation, and operational best practices.

Marketing Operations Manager - Cornology *2011-2016* - Spearheaded a full brand overhaul (logo, packaging, store layouts, e-commerce site) and evolved the business model from local retail to wholesale, bulk, and online sales.

Technical Engineer - Community Presbyterian Church *2004-2010* - Led multidisciplinary design teams and provided technical insight for lighting, audio, and video integrations across live event productions.

Personal Projects

Design and direct custom software using AI-assisted development tools, specifying features, testing, and managing builds through release, all without a traditional coding background.

- **Sitecraft** - a macOS WYSIWYG website builder for Jekyll with a drag-and-drop canvas and mobile preview, publishing directly to a live GitHub Pages site with one click.
- **Fusion Voice** - a macOS adaptive speech processor, combining an ffmpeg-based audio pipeline with an AI noise-reduction model, automated dependency installation, and versioned builds.
- **Chronicle** - a browser-based visual timeline builder with print, PDF, and video export, connected to a two-way Google Sheets and Apps Script backend enabling multi-contributor data entry and automated photo uploads to Google Drive.
- **Bayberry** - a macOS screen-presenting and projection-mapping utility app.
- **Unnamed** - A custom speaker-tuning app that translates acoustic measurement theory (equal-loudness/ Fletcher-Munson curves) into real-time parametric and graphic EQ recommendations.
- Multiple Google Apps Script automations for personal workflow tools, including a receipt-capture and expense-tracking system integrated with Google Drive and Sheets.

CORE COMPETENCIES

Cross-Functional Leadership - Stakeholder Management - Cross-Team Messaging & Positioning Alignment - Agile/Scrum - End-to-End Project & Asset Lifecycle Ownership - Quality Assurance (QA) Testing - Global Localization & Compliance - Budgeting, Scope & Timeline Dependency Tracking - Vendor & Partner Coordination - Team Leadership & Training - Live & Broadcast Production Management - UI/UX Animation Oversight - AI-Assisted Rapid Prototyping & Application Development

TECHNICAL PROFICIENCIES

Project Management Tools: Asana, Jira, Wrike, Windchill PLM

Creative Suites: Adobe Premiere Pro, Photoshop, Illustrator

Productivity & Collaboration: Apple iWork, Microsoft Office Suite, Google Workspace

Technical: Live Audio, Computer Networking, Computer Hardware, Ubiquiti, Meraki, Dante Audio

EDUCATION & CERTIFICATIONS

Associate Degree / Coursework in Computer Networking Technology - Diablo Valley College (2008)

Dante Audio Networking Certification - Level II (2020)

Microsoft Certified Professional (MCP) - Computer Networking Technology (2013)
